Continuation Sheet (PTOL-303)

Continuation of 2. NOTE: The proposed amendment transforms the claim from the product claim to a product-by-process claim, introducing limitation on how the claimed polyester was produced, and therefore at the least removing the reference to Rao from the scope of the 35 USC 102 rejection. This requires at least new consideration and/or new search.

Continuation of 5. does NOT place the application in condition for allowance because: it is mainly based on the proposed amendment tha has not been entered. If not enterd the reference to Rao still reads on the limitations of the instant claims, because even if obtained by a different method the product can still be the same (prima facie). In the product-by-process claims the criticality or the unobviousness of the method can contribute into different structure and/or characteristics of the product.
